## Cralonin® Oral Drops

### Read all of this leaflet carefully because it contains important information for you

Cralonin® is available without a doctor's prescription, for you to treat a mild illness. Nevertheless you still need to use Cralonin® carefully to get the best results from it.

- Keep this leaflet. You may need to read it again.
- Do not share Cralonin® with any other person.
- Ask your pharmacist if you need more information or advice.
- You must see a doctor if your symptoms worsen or do not improve.

### 1. What Cralonin® contains

100 g cont.:

The active substances are: Crataegus Ø 70 g; Spigelia anthelmia D2 1 g; Kalium carbonicum D3 1 g.  
The other ingredients are: Ethanol 96%, Purified water.

**Contains 45% v/v ethyl alcohol.**

### 2. What Cralonin® is used for

Pharmacological classification: D. 33.2 Homeopathy

Discipline of the medicine: Homeopathy

This medicine is prepared in accordance with homeopathic principles and is proposed for use in senile heart, consequences of damage to the cardiac musculature, nervous cardiac disorders, piercing cardiac pain, and cardiac pain of other nature (e.g., anginose complaints).

### 3. Before you take Cralonin®

**Do not take Cralonin®:**

- if you are hypersensitive (allergic) to active substances or any of the other ingredients of Cralonin®.

### Pregnancy and Breastfeeding

If you are pregnant or breastfeeding your baby while taking this medicine, please consult your doctor, pharmacist or other healthcare professional for advice.

### Important information about some of the ingredients of Cralonin®:

This preparation contains only very small amounts of alcohol per unit dose. Still, it is recommended that alcoholics consult with a health professional before taking this preparation. A temporary aggravation of the existing symptoms is possible after taking a homeopathic preparation.

### Taking other medicines with Cralonin®:

If you are taking other medicines on a regular basis, including complementary or traditional medicines, the use of Cralonin® with these medicines may cause undesirable interactions. Please consult your doctor, pharmacist or other healthcare professional for advice.

### 4. How to take Cralonin®

Do not share medicines prescribed for you with any other person.

Always take Cralonin® exactly as your doctor has instructed you. You should check with your doctor or pharmacist if you are unsure.

The usual dose is:

Typical dosage for long term therapy: Adults: Take 10-20 drops 3 times daily. Hold in mouth 10-15 seconds before swallowing. In acute disorders, take 10 drops every 15 minutes (Caution: the patient should not take the medication in this dosage over lengthy periods of time without control by a physician). Shake before use. The drops may be taken in a little water. It is recommended not to eat or drink 15 minutes before or after taking the medication.

**If you take more Cralonin® than you should:**

In the event of overdosage, consult your doctor or pharmacist. If neither is available, seek help at the nearest hospital or poison control centre.

**If you forget to take Cralonin®:**

Do not take a double dose to make up for forgotten individual doses.

**5. Possible side effects**

Cralonin® can have side effects.

None known.

Not all side effects reported for Cralonin® are included in this leaflet. Should your general health worsen while taking this medicine, please consult your doctor, pharmacist or other healthcare professional for advice. If you notice any side effects not mentioned in this leaflet, please inform your doctor or pharmacist.
